- **6th November 2026:** School Internal Deadline for all other UCAS applications (*allows essential time for referee checks, references, and processing*).

Information for Parents & Carers: Cumbrian Labour Market Information (LMI)

Understanding Labour Market Information (LMI) helps families navigate where future job growth, competitive salaries and long-term career opportunities are emerging locally and nationally.

Key Cumbrian LMI Highlights:

- **Nuclear & Sustainable Energy Transition:** West Cumbria remains one of Europe's largest hubs for nuclear decommissioning, clean energy and environmental engineering (Sellafield, Supply Chain partners, and emerging SMR projects). High demand exists for degree apprentices in project management, cyber security, and mechanical/electrical engineering.
- **Advanced Manufacturing & Defence:** BAE Systems in Barrow and regional supply chain firms continue to expand, creating long-term, high-value career pathways in technical engineering, logistics and digital systems.
- **Health & Social Care Growth:** NHS North Cumbria Integrated Care is actively recruiting across clinical (nursing, medicine, allied health) and non-clinical roles (data analysis, IT, estates management).
- **Visitor Economy & Agritech Transformation:** Beyond traditional tourism, Cumbria's hospitality and land-based sectors are increasingly integrating digital marketing, commercial management, sustainable agriculture and eco-tourism management.

How Parents Can Use LMI at Home:

- **Explore Unifrog:** Encourage your child to use the LMI tool on Unifrog to compare average starting salaries, weekly working hours and projected career growth for specific roles.
- **Focus on Transferable Skills:** Technical knowledge matters, but local employers consistently highlight communication, problem-solving, digital literacy and resilience as key entry requirements.
- **Consider Alternative Pathways:** Degree Apprenticeships now allow students to earn a full university degree paid for by an employer without incurring tuition debt, particularly in engineering, IT, and finance.
