Advice for Parents

The simplest and most effective thing a parent can do is to ask their son or daughter 'What did you learn about in school today?' This opens up a dialogue and allows pupils to revisit their lessons and consider what learning took place and how to communicate this. Wide-ranging reading is a powerful way to improve progress in all subjects.

Watching 'science in the news' will develop interest and purpose in the science being taught, and open eyes to the varied opportunities science offers.

- Key Stage 3 students have a CGP revision guide
- Key Stage 4 students have a GCSE revision guide
- Key Stage 5 students have CGP textbooks
